

JANUS MARITZ

FULL STACK DEVELOPER

+27761603036 | janusmaritz7@gmail.com | Kimberley, South Africa | [LinkedIn](#) | [GitHub](#) | [Website](#)

CAREER SUMMARY

Full-Stack Developer with a BSc in IT and a background in Software Support. Experienced in developing cloud solutions using Angular, C#, and Azure. Capable of managing DevOps workflows with YAML and Bicep, and optimizing data through SQL and Snowflake. Focused on delivering reliable software within Agile environments while leveraging a strong foundation in technical troubleshooting.

EDUCATION AND CERTIFICATION

Bachelor's degree in IT North West University	2021
AZ-900: Azure Fundamentals Microsoft, South Africa	2024

AREAS OF FAMILIARITY

Full-Stack Development | Cloud Operations | DevOps Integration | Data Handling | Agile Methodology | Support

TECHNICAL SKILLS

Back-End & Database

C#/.NET | EF Core | RESTful APIs | Onion Architecture | SQL (Efficient Querying) | Snowflake

Front-End Development

Angular | Typescript/JavaScript | HTML5/CSS3

DevOps & Tools

Azure DevOps | CI/CD Pipelines | YAML | Git (Source Control)

Software Support & Methodologies

Agile/Scrum | JIRA | Technical Troubleshooting | Python (Scripting/Automation) | Service Desk Operations

WORK EXPERIENCE

Junior Analyst Developer | 1Nebula 2024 - Present

- Full-Stack:** Developed responsive cloud apps with Angular and C#/.NET.
- DevOps:** Managed Azure CI/CD pipelines using Bicep and YAML automation.
- Data:** Authored optimized SQL and managed Snowflake data warehouses.
- Agile:** Contributed to all SDLC phases, from sprint planning to retrospectives.
- Support:** Resolved complex Azure cloud issues to improve performance and uptime.

Software Support Engineer | 1Nebula 2022- 2024

- Cloud Support:** Diagnosed and resolved global Azure cloud environment issues as Tier 2 support.
- Data Investigation:** Leveraged SQL to extract reports and identify critical data inconsistencies.
- Process Automation:** Reduced manual effort by building Python scripts for routine support tasks.
- Incident Tracking:** Managed bug escalations and cross-team collaboration to meet all SLAs.
